

QUESTIONS		ANSWERS
1	1. What is the main purpose of the study?	To investigate the effect of the new teaching method on the learning of English grammar.
2	2. What is the research hypothesis?	The new teaching method will lead to a significant improvement in the learning of English grammar compared to the traditional method.
3	3. What is the independent variable?	The independent variable is the teaching method (new vs. traditional).
4	4. What is the dependent variable?	The dependent variable is the learning outcome (score on the grammar test).
5	5. What is the significance level?	The significance level is set at 0.05.
6	6. What is the sample size?	The sample size is 60 students.
7	7. What is the data collection method?	The data collection method is a quasi-experimental design with a pre-test and post-test.
8	8. What is the data analysis method?	The data analysis method is a t-test for independent samples.
9	9. What is the conclusion?	The conclusion is that the new teaching method significantly improves the learning of English grammar.
10	10. What are the limitations of the study?	The limitations of the study are the small sample size and the lack of a control group.

[illegible]
